

Concrete Mixer Portable Mixing Machine

Model NO : FD500

After-sales Service:	Spare Parts
Warranty:	12 Months
Type:	Concrete Mixer
Shotcrete Type:	Dry
Machining Process:	Hydraulic
Structure:	Spiral Type

Product Description

- 1.All-steel construction, Mini Concrete Mixer has long life span.
- 2.Large wheels, It's easy to move the Mini Concrete Mixer to anywhere.
- 3.Diesel/gasoline/electric motor,optional as customers' requirement. Mini Concrete Mixer is powerful.
4. Cast iron gear for Mini Concrete Mixer steady and silent working.
- 5.Spray painted surface,colour as your request.
- 6.EPA certificated wheels,wheels size:520mm.
- 7.Guarantee time:six months warranty
- 8.water supply mode:direct input
- 9.Discharging:semi-automatic

Product Description:

Concrete mixer is a machine that has entirely changed the traditional way of mixing concrete by hand. It is preferred over hand mixing, as it provides an easy and quick mixing of sand or gravel and water needed to produce concrete. Depending on the application, the concrete mixer ranges from large concrete mixing truck to a portable concrete mixers. A portable concrete mixer consists of a motor, a rotating drum, blades. The ingredients of concrete are added in the drum and spun to mix them evenly to form a smooth and soft mixture for forming and applying.

Technical Specification:

Model NO.	FD500
Capacity of bowl	140L/5CF
Diameter of bowl	dia.24"
Motor:	2.2kW
Max. torque	3.2n.m/3000rpm
Motor speed	3600
Capacity of oil tank	1.4L
Orgin	China
